Syllabi By Semester & Degree

This section contains course-related information on syllabi which show objectives, assignments, schedules, textbooks, and electronic course readings.

Syllabi will be available no less than two weeks prior to the first day of class. You may be able to access your course syllabus early to find out how the course will be run, what the assignments are, etc.

If your class isn't linked yet you can check again at a later date. Or you can look for your instructor's course in a previous semester, or look for your instructor's course number, or you can search former faculty.
New! Search by course topic.

Overview

The San Jose State University (SJSU) School of Information prepares individuals for careers as information professionals. Graduates work in diverse areas of the information profession, such as user experience design, digital asset management, information architecture, electronic records management, information governance, digital preservation, and librarianship. The SJSU School of Information is a recognized leader in online education and received the Online Learning Consortium's Outstanding Online Program award. For more information: ischool.sjsu.edu

Programs

Undergraduate Major(s)

- Information Science and Data Analytics, BS
- Information Science and Data Analytics, BS (SJSU Online)

Master(s)

- Archives and Records Administration, MARA
- Informatics, MS
- Library and Information Science, MLIS

Basic Certificate(s)

Basic certificate programs provide opportunities for students to pursue specialized, often pre-professional, focused educational objectives that may be separate from a degree program.

- Human-Centered Artificial Intelligence Certificate

Advanced Certificate(s)

An advanced certificate program offers post baccalaureate students coursework leading to a specific, applied, focused goal.

- Library and Information Science Post-Master's Certificate
- Strategic Management of Digital Assets and Services Certificate

Credential(s)

Credentials are primarily granted by the California Commission on Teaching Credentialing.

- Teacher Librarian Credential

Roadmaps

- Roadmap: Information Science and Data Analytics, BS
- Roadmap: Information Science and Data Analytics, BS (2-Year SJSU Online Program)
- Roadmap: Information Science and Data Analytics, BS (3-Year SJSU Online Program)

Courses

Informatics

- INFM 200 - Informatics: Fundamentals
- INFM 201 - Informatics: Technology Foundations
- INFM 202 - Informatics: Security Overview
- INFM 203 - Big Data Analytics and Management
- INFM 204 - Human Centered Design
- INFM 205 - Informatics: Project Management
- INFM 206 - Electronic Records: Foundations
- INFM 207 - DAM: Digital Assets Management
- INFM 208 - Information Security: Info Assurance

- INFM 210 - Health Informatics
- INFM 211 - Informatics Culminating Project
- INFM 213 - Epidemiological Methods
- INFM 214 - Health Data and Analytics
- INFM 215 - Network Security
- INFM 216 - Computer Digital Forensics
- INFM 217 - Tools Lab
- INFM 284 - Seminar in Informatics

Academic Support

Accessible Education Center

Students who need accommodation due to a disability must register with SJSU's Accessible Education Center (AEC). The Center will work with the students to determine the disability, document it, and determine the services and accommodations necessary for student success. Then, the AEC will contact the faculty member to determine the types of consideration necessary.

The AEC Web site: www.sjsu.edu/aec

craig.simpson@sjsu.eduDr. Sue Alman coordinates captioning services for deaf/HOH students at iSchool. New students should contact Dr. Alman when enrolling in their first courses, so that Dr. Alman can make captioning arrangements each semester. More information is available on the school's Accessibility Policy.

King Library Orientation

King Library Home | A-Z Databases

King Library Resources for Library and Information Science

King Library Online Students' Guide

The King Library at San José State University provides both print and electronic resources. The following information will help you learn to access the materials.

- Watch the King Library Orientation Videos. These four videos cover how to get started with library materials.
- King Library Web Site. One way to get to the library home page is to use the "King Library" link at the top of each iSchool web page. Or, go directly to library.sjsu.edu
- Library Online Tutorial for School of Information Students (LOTSS). There are three videos in the LOTSS tutorial series.
- Library Resources for School of Information Students. This page on the King Library Web site has contact information for our library liaison as well as other library departmental links and ways to get additional library materials.

- Google Scholar Tutorial: Customizing Google Scholar

- Online Databases. Databases containing full-text articles from journals and newspapers are available to students.
    1. Useful databases for iSchool classes - List of databases
    2. The log-in for library resources is the same as for Canvas.
    3. Help with connecting to databases: Contact the King Library's Student Computing Services Center for assistance. Call 408-808-2470 during library open hours or email.
    4. Journals Search. Do you have a citation that you'd like to read online? This is the tool to use.
    5. Search for the journal title and follow the link to see which online databases includes the journal.
    6. Click on the link for the database listed in your results that appears to cover the date you need.
    7. Using the appropriate log-in, access the database and search for the article in your citation.

Contact the iSchool Library Liaisons by emailing:

MLIS Liaison Librarian: Silke higgins (silke.higgins@sjsu.edu)
MARA Liaison Librarian: Craig Simpson (craig.simpson@sjsu.edu)

Writing Support

The School of Information offers a variety of types of support for graduate-level writing. A writing tutor is available to iSchool students who would like to review their work with a specialist. See the link below for details.

- Writing Tutoring Information

Other writing resources have been identified and are listed on the pages linked below. Note that strategic reading of academic material helps to build the foundation for effective writing. Look at the academic reading resources which are included:

- Academic Reading Resources
- Writing Resources for Instructors
- Writing Resources for Students

SJSU offers the "Grad Writer Toolbox" which every student may utilize:

- Go to the Toolbox

APA

APA Style Resources

Many iSchool faculty require APA style. The Publication Manual of the American Psychological Association is available through bookstores and is listed in the iSchool e-Bookstore. In addition, a few resources that provide helpful highlights and summaries are listed below.

Note: Sites not officially associated with APA may not reflect the most current APA style rules. The Publication Manual of the American Psychological Association (7th edition) is the most recent official style manual.

The Official APA Site

APA Style
Includes information on learning the basics of APA style and a reference quick guide. The APA Style Blog offers additional insights with questions and answers.

See an annotated sample student paper.

Additional Resources

APA Style | Seventh Edition
Excelsior College Online Writing Lab
This site includes explanations and examples of references, in-text citations, and formatting. It includes a side-by-side comparison of reference and in-text citation examples.

Writing & Citing
Library and Information Science Research Guide, King Library, San Jose State University

Writing Tutoring Information

Our Writing Specialists (tutors) are students who have met a rigorous GPA requirement and are highly trained at SJSU's Writing Center. Writing Specialists can help you organize your paper, cite sources, avoid plagiarism, and use correct grammar and

punctuation. They understand the special needs of students learning English as a second language and returning students.

All tutoring appointments are scheduled through our Online Reservation System.

Note: If you are not a student at the School of Information, please schedule your appointment through the SJSU Writing Center – https://www.sjsu.edu/writingcenter/

iSchool Writing Center Appointment and Policy Information

- You must be a student in the School of Information (a grad student in one of our grad programs or undergrad in the BS ISDA program).
- Appointments are scheduled in WCOnline and made on a first-come, first-served basis
- Tutoring sessions conducted using Zoom. There is no charge for a tutoring session.
- Appointments are in Pacific Time
- You may schedule, in advance, a maximum of one 45-minute appointment per day and up to two per week.
- The tutor will wait 10 minutes. After 10 minutes, the appointment will be noted as a “no show” and the tutor will leave the session.

  Failure to cancel a tutoring session will result in a ”No-Show” missed appointment. An account that registers two “No-Shows” will be disabled for the remainder of the semester.

FAQ

How should I prepare for my tutoring session?
Before your session, carefully review the assignment and begin your work on it.

What is Zoom?
Student Guide to Using Zoom.

What will I need during the tutoring session?
You will need the file with the writing that you want to work on, along with the details of your assignment, any preliminary research or notes, and a general idea of what you would like the specialist to help you with.

You will share these files during the tutoring session so you will need to have access to the files on the computer you use for the session.

How do I contact my tutor?
You can reach your iSchool Writing Center tutor at ischoolwritingcenter@gmail.com

What happens if I am late for my session?
The tutor will wait 10 minutes. After 10 minutes, the appointment will be noted as a “no show” and the tutor will leave the session.

Example of a Standard Tutoring Session

You will log in to the Zoom session using the link that was sent to you in your appointment confirmation. You should see the Writing Specialist’s name in the participants area. You will need a microphone and speakers so that you can fully participate during the session. You should run the audio set-up wizard to work out any sound issues before your tutoring session begins.

The Writing Specialist will begin your session by asking what type of writing you’ve brought to work on and what concerns you have — what exactly do you want to cover during this session? You will provide the Writing Specialist your assignment, prompts, or any other relevant material. You will use tools within Zoom to share these documents. The Writing Specialist will instruct you on how to do this and will do his or her best to address as many of your concerns as possible.

During the session, your Writing Specialist may ask you to read your paper aloud. By hearing the paper read aloud, you will catch errors in the paper and correct them. You will also identify sentences that sound awkward or incoherent.

After you have read the paper aloud, your Writing Specialist will note one or two things you will focus on during the session. The session is forty-five minutes long.

You, the student, will retain ownership of your work. The Writing Specialist will ask you to make edits on your document. You will be actively involved in figuring out ways to improve your work.

At the end of the session, your Writing Specialist will take a few minutes to review and reinforce what you worked on during the session. If you weren’t able to get through the entire paper, the Writing Specialist may recommend that you make another appointment to continue working on your assignment.

With your permission, the Writing Specialist will follow up the session with an e-mail to your instructor. The e-mail will give your name and course, and it will briefly state what you worked on. Instructors find it very helpful to receive this information.

Appointment Help

How to Make an Appointment

If you haven't registered with the Writing Center before, you must register for the first time and fill out the registration form before logging in.

Writing Resources for Students

Listed below are links to authoritative websites on the mechanics and process of writing at a graduate school level. Please scroll below to explore these resources, which include APA style guides, help centers for students learning English as a second language, and tips on thesis development.

Comprehensive Sites

- Excelsior's Online Writing Lab - Resources on writing, style, grammar, a variety of style manual formats, and a writing game!
- San Jose State's Writing Center - Handouts and video tutorials on a variety of topics.
- San Jose State's Grad Writer Toolbox – Resources for writing research papers, making presentations, citing sources, managing time, and more.
- Yale University's Center for Teaching and Learning – A wide range of excellent tutorials.
- University of North Carolina at Chapel Hill's Writing Center – Another set of excellent of tutorials.

Writing Skills

- Caroline and Pearson Brown's English Grammar Lessons – Clear and concise explanations of English grammar. Each lesson ends with interactive quizzes.
- English Page Grammar Tutorials and Lessons – Tutorials and quizzes.

APA

- King Library's "Citing and Writing" Guide
- Excelsior OWL APA Style (7th edition)
- San José State University's School of Information APA page

Essay Writing

- Yale's What Good Writers Know
- Harvard's Strategies for Essay Writing
  A Brief Guide to the Elements of the Academic Essay
  Common Mistakes in Graduate Writing

Academic Reading Resources

One of the best ways to learn to write for an academic audience is to read academic literature. The following resources provide guidelines on how to do this effectively.

- Cuesta College's Academic Support Guides for Reading Comprehension - 12 guided pages of academic reading help.
- Dartmouth College:
  - Reading Your Textbooks Effectively and Efficiently - Links to articles on reading myths, 5 strategies for academic reading and where to read.
  - How to Improve Learning Skills (Video)
- Penn State University's So Your Students Aren't Reading?! - By Suzanne C. Shaffer
- San José State University iSchool's Reading Academic Literature Strategically – By Prof. Anthony Bernier
- University of North Carolina at Chapel Hill's Reading to Write
- Washington University's How to Read an Academic Article - By Becky Rosenberg, PhD. One short, concise, but excellent page of reading strategy.

Databases

A number of databases are available to students and faculty. Faculty may require use of specific databases in some classes. In general, you will have access to a large number of databases through the King Library throughout your student career. For databases not available through the library, you will need the current iSchool Restricted Materials username and password to access some resources. This log-in will be provided by your instructor and is updated each semester. The password is for the use of faculty and students only and should not be shared with anyone outside the program.

Listed below is information about specialized services available to our students.

Center for Computer Assisted Legal Instruction (CALI)

Students, faculty and staff have unlimited access to over 850 interactive lessons related to legal education. Lessons focus on legal topics but also include the following topics of interest to all LIS students:

- Government Documents
- Periodicals Indexes and Library Catalogs
- Punctuation and Grammar Basics
- Punctuation and Grammar Advanced

Current students can use the iSchool Restricted Materials login to access further details.

Dialog

ProQuest Dialog may be requested by instructors. Refer to ProQuest information below.

LibGuides

Faculty members who wish to have their students create LibGuides pages should contact Abigail Laufer for information about accounts. LibGuides is part of a package that also includes LibWizard, LibAnswers, and LibCalendar. Faculty members can make these available to their students also.

NoveList

To access NoveList, students must use the NoveList login. **Get the NoveList login** (you will need the current SJSU iSchool Restricted Materials login to access the page).

After you have the NoveList login, use it to access either of the following databases:

NoveList K-8: http://search.ebscohost.com/login.aspx?authtype=ip,uid&profile=novpk8

NoveList Plus: http://search.ebscohost.com/login.aspx?authtype=ip,uid&profile=novplus

OCLC – First Search

First Search login page: firstsearch.oclc.org/

The FirstSearch databases that OCLC produces (WorldCat in particular) are available without restriction, but the third party content (H.W. Wilson for example) is not.

This database is available exclusively to current Cataloging instructors and students.

ProQuest

ProQuest databases are offered through King Library and there is also the Graduate Education Program directly through ProQuest with more extensive offerings. Instructors who wish to use these resources may make arrangements directly with ProQuest; refer to https://www.proquest.com/about/library-advocacy/Graduate-Education-Program.html.

Degree Progress Planning

SJSU encourages students to complete their graduate degrees within three years. There is no requirement to do so, however, these tips can help MLIS and MARA students plan to complete the program within three years.

- Plan ahead for academic success. Make financial aid inquiries and prepare your home computing environment *before* you start. Work through your New Student Checklist.
- Take summer sessions to catch up or get ahead.
- Plan a realistic course load. Adjust it for your life demands.
- Do not repeat courses. Avoid overloading, only to drop classes late in the semester. This wastes time and money. Repeating courses to meet requirements or raise your GPA slows you down. Keeping current in all your assignments and readings and attending to discussions will help you stay off academic notice and on progress.
- Make early and full use of the academic advising and career development resources available to you, including the iSchool MLIS Student Success Planner a customizable workbook for planning your courses and your own career checkpoints.
- Seek help immediately if you are having problems.
- Don't wait until the end of your program to plan your core courses and electives, which should blend the School's competency requirements with your career pathway goals. You want to avoid having to take extra classes at the end of your program to fulfill a competency. Early on, take a close look at competencies mapped to classes and consider how work projects, volunteer assignments and internships can help you fulfill competency requirements. There are many tools and resources available on the iSchool Advising site in Canvas that can help you, in consultation with your advisor, create a focused plan to complete your degree

Can I graduate within 3 years? Yes you can!

If you take 2 to 3 classes a semester, you can obtain your degree within 2 to 3 years. Read on for more details on: MLIS course load, INFM course load scenarios and MARA rotations

Filling out this optional form at the beginning of your first semester benefits you and the iSchool:

1. Helps the iSchool anticipate future enrollment demands
2. Helps you create a plan that would allow you to graduate within three years

- Fill out the form now: iSchool Unit Planning Tool

Note this unit-planning tool is not an official contract. It is not to be confused with your Candidacy Form – an official SJSU form which notifies the Graduate Admissions and Program Evaluation office of your degree progress when you are ready to advance to graduation status.

The unit-planning tool allows you to input various scenarios of "units per semester" and the calculator will display a running total as you progress through the tool. Resubmit the form whenever you would like, as you progress through the program.

Are you planning to complete your degree in more than three years?

No problem. Enter any comments about your particular unit plan in the comments field that you would like to share with the iSchool Student Services staff. This information will help us anticipate demand for course scheduling.

Working full or part time while raising a family? Yes, you can graduate within three years!

Tips from Student Writers from the iStudent Blog:

- Life + Work + School – How Can I Get it All Done
- Finding a Balance Between Work and School

Captioned Presentations:

- How to Succeed in an Online Learning Environment While Working Full-Time
- Step Back From the Ledge: How to Integrate a Full-Time Course Load into an Already Full Life

Student Resources Quick Links

Student Services and Advising Support

- Student Services Team: answers questions regarding admission requirements and the application process for prospective students, and can advise all new students. Continuing students may contact the Student Services Team with questions regarding holds, withdrawal petitions, leave of absence, candidacy forms, substitution forms, academic progress questions, graduation applications and questions about how to use the Advising Toolkit and its resources. They will also be able to help with name and address changes, transcript questions, transfer credit, and scholarship information. The Student Services Team is available to students through their handy help form, via Live Chat service hours or Zoom appointments.
- Advising FAQs and the Advising Toolkit Get touch of a button answers to the questions you have about procedures and course planning. Download the MLIS Student Success Planner and start tracking your focused plan, advising notes and competencies in one convenient location.
- Registration and Enrollment
- Financial Aid and Scholarship Office
- Advising: When you are ready to think about choosing your electives, consult a faculty advisor for:
    - Questions about courses needed to meet your career goals
    - Preparing for a career in their area of expertise.

Technology Support

Our school's online learning environment includes a wide array of emerging technology, enabling SJSU iSchool students and faculty to interact and collaborate, regardless of their geographic location. We invite you to browse this section of our website, which provides information regarding the technology we currently use in our programs.

In addition, the technical support team at the SJSU School of Information assists students and faculty who may need help, or who want to increase their knowledge regarding technology use. Support includes online tutorials and one-on-one consultation. All new students are required to complete a one-unit course that introduces them to the technology used in iSchool courses.

Our aim is to integrate emerging technology into our teaching and learning environment, enriching the learning experience for SJSU iSchool students and preparing them for success in a profession that increasingly demands competent use of technology to improve information services.

Troubleshooting

Why do I get an error when I log in?

An error occurs when a user is using an incorrectly bookmarked link to log into Canvas. Please type in the URL for Canvas directly into the browser of your choice: https://sjsu.instructure.com

Caspio

Caspio Tutorials

The Caspio database management software is used in the INFO 202 Information Retrieval System Design course, effective Summer 2022. Support materials and tutorials are available on the INFO 202 course resources blog: https://ischoolblogs.sjsu.edu/202/

Read more

Zoom

San Jose State University uses Zoom for web conferencing. Zoom includes an instant message tool which expands communication options for students and faculty members.

Each iSchool student and faculty member has their own Pro Zoom account. Pro account users can host unlimited meetings. Meeting participants do not have to be affiliated with SJSU nor do they have to have Zoom accounts to join a meeting. Zoom can host meetings with up to 300 participants.

Home Computing Environment

Minimum Requirements

Please note that the School requires that **prior to enrolling** and starting the INFO 203 course all incoming students have **computer access in their homes** with the following minimum hardware, as well as **home internet access:**

iSchool Alert and Email Lists

The iSchoolAlert notification system is used to distribute information to the iSchool student community.

All active students are automatically added to iSchoolAlert and will periodically receive important administrative information via iSchoolAlert. All members of the iSchool student community are required to remain on iSchoolAlert.

Wordfence

Support for Wordfence login questions and issues

The School of Information uses the Wordfence security program across our extensive WordPress infrastructure. This site is intended to provide support for students and faculty who have Wordfence-related issues or questions when logging into WordPress.

Two-Factor Authentication: For users who are new to Two-Factor Authentication (2FA), we strongly recommend that you review all of the articles below for instructions on how to set up 2FA for your iSchool WordPress account(s). 2FA is now mandatory for all iSchool WordPress users.

Canvas

Troubleshooting

Why do I get an error when I log in?

An error occurs when a user is using an incorrectly bookmarked link to log into Canvas. Please type in the URL for Canvas directly into the browser of your choice: https://sjsu.instructure.com

Canvas users can bookmark it, but only **AFTER** logging into Canvas, not when on the SSO login page. It is also a good idea to clear your cache: http://www.wikihow.com/Clear-Your-Browser's-Cache

I know my password, but it stopped working!

Passwords expire every 180 days. If 180 days pass before you change your password, that password will expire and you will need to create a new password, as follows:

Go to one.SJSU Account Management. Enter your 9-digit ID, and then follow the instructions to create a new password.

I need technical support. Please help!

For technical help, please use the "help" form in Canvas. See a short video for guidance.

Note: help is provided by CFETI (Center for Faculty Excellence and Teaching Innovation) Monday – Friday 8am-5pm Pacific time.

Caspio

Caspio Tutorials

The Caspio database management software is used in the INFO 202 Information Retrieval System Design course, effective Summer 2022. Support materials and tutorials are available on the INFO 202 course resources blog: https://ischoolblogs.sjsu.edu/202/

Zoom

San Jose State University uses Zoom for web conferencing. Zoom includes an instant message tool which expands communication options for students and faculty members.

Each iSchool student and faculty member has their own Pro Zoom account. Pro account users can host unlimited meetings. Meeting participants do not have to be

affiliated with SJSU nor do they have to have Zoom accounts to join a meeting. Zoom can host meetings with up to 300 participants.

Recordings can be made in the Zoom meetings and saved to the host's computer. Faculty members also have an option to record to the cloud.

You should not set up an individual account at zoom.us. Always use sjsu.zoom.us for access in order to enjoy the benefits of the Pro account SJSU has provided you.

Setting Up Your Zoom Account
All SJSU students and faculty members have Zoom Pro accounts. Your account offers you the ability to host – and record -meetings with no time limit. You have a personal meeting "room" with a link and meeting ID that you can customize for ad-hoc/instant meetings. Meetings are also fully accessible with the Live Transcript feature enabled during your session (see step 6).

Securing Zoom Meetings

Zoom has made an important update to help make your meetings more private and secure. Before hosting your next meeting, check to see if you are running the latest version of Zoom or visit their download page to update to the latest version.

Setting Up Your Zoom Account

All SJSU students and faculty members have Zoom Pro accounts. Your account offers you the ability to host – and record -meetings with no time limit. You have a personal meeting "room" with a link and meeting ID that you can customize for ad-hoc/instant meetings. Meetings are also fully accessible with the Live Transcript feature enabled during your session (see step 6).

How do you access all of this? Get started by setting up your profile and basic meeting preferences.

1. Login at https://sjsu.zoom.us and click "Sign in." (Do not go directly to zoom.us. Always use the SJSU-branded portal page for Zoom.)

- Username: SJSU 9-digit ID
- Password: SJSUOne Password (the same one you use to access Canvas)

2. Select **Profile** from the left menu. Hover over the image box to add your profile picture. In Profile, you can also change the date and time zone, the language, and your personal meeting room ID.

Your Personal meeting room is a virtual meeting room permanently reserved for you to can access with your Personal Meeting ID (PMI) or personal link. It's ideal for use with people you meet with regularly.

Note: Because the personal room is always accessible with the same meeting ID and personal link, it should not be used for back-to-back meetings or people you do not meet with regularly. Once a participant has the link to your PMI, they can join it any time the meeting is in use, unless you lock the meeting or use the Waiting Roomfeature to admit participants individually.

Meeting Settings

1. In the left menu, select **Settings**. The settings you select on this page will apply to all of the meetings you set up.
2. Under the **Meetings** tab, select **Security** settings

Recommended settings:

- *Require that all meetings are secured with one security option*: enable

- *Waiting room*: enable
  A waiting room puts each of your meeting attendees into an individual space where you can verify they are who they say they are. You then have the option to release all people from the waiting rooms, or individually allow them in.

- *Require a passcode when scheduling new meetings*: enable
  Zoom automatically generates a 6 digit passcode for each new meeting created, and these passcodes are embedded in the invitation URLs.

- *Require a passcode for instant meetings*: enable

- *Require a passcode for Personal Meeting ID (PMI)*: enable

- *Embed passcode in invite link for one-click join*: enabled

- *Only authenticated users can join meetings*: personal preference
  All SJSU Zoom meetings by default have passcodes, but anyone with the meeting link details can join your Zoom meeting. With authentication, your attendees also need to sign in to Zoom and be verified as valid Zoom users. Every CSU student and employee is a valid Zoom user, so this is a great feature to enable when everyone in your meeting or class is a CSU person. Learn more at SJSU Authentication website.

3. Scroll down the page and locate the **Schedule Meeting** settings.

Recommended settings:

- *Host Video*: disable
  You can still turn on your video in the meeting but this setting ensures your camera doesn't come on automatically when you enter your meeting.

- *Participants Video:* disable
  Participants can still turn on their cameras in your meetings, but this setting ensures their cameras do not come on automatically when they enter your meeting.

- *Audio Type*: Telephone and Computer Audio
  This gives participants the option to use a telephone for audio if their computer audio doesn't work.

- *Allow participants to join before host*: disable
  If you enable this, participants will be able to enter the meeting room before you (or another host) enter. If you do not enable this, participants who try to connect before the host will see a notification that they will be joined to the room when the host has entered.

- *Mute all participants when they join a meeting*: enable
  Automatically mutes all participants when they join the meeting. The host controls whether participants can unmute themselves

4. Scroll down the page and locate the **In Meeting (Basic)** settings.

Recommended settings:

- *Meeting Chat*: enable

- *New meeting chat experience*: enable
  meeting chat features, including threaded replies, text formatting, quoting, and in-line image preview.
    - *Allow participants to react to meeting chat messages using emojis*: enable

- *Meeting Chat Direct Messages*: personal preference

- *Sound notification when someone joins or leaves*: personal preference
  You can decide whether or not you want an audible alert each time someone joins or leaves the session. Regardless of your selection, you will always hear an alert when the first person joins the room.

- *Send files via meeting chat*: enable

- *Co-Host*: enable
  Co-hosts have the same in-meeting controls as the host.

- *Meeting Polls/Quizzes*: enable
  Allow host to use 'Polls' in meetings. Hosts can add polls before or during a meeting.

- *Show raised hand in toolbar*: enable

- *Show Zoom windows during screen share*: enable

- *Screen sharing*: enable (Host only)
    - *Who can start sharing when someone else is sharing?* Host Only
- *Annotation*: enable

- *Whiteboard (Classic)*: enable

- *Slide Control*: enable
  During a presentation, the person who is sharing can allow others to control the PowerPoint or Keynote slide presentation

- *Non-verbal feedback*: enable

- *Meeting reactions*: enable

5. Continue down the page and locate the **In Meeting (Advanced)** settings.

Recommended settings:

- *Q&A in meetings*: enable
- *Breakout room – Meetings*: enable
- *Automated captions*: enable
- *Full transcript*: enable
- *Save Captions*: enabled
- *Virtual Background*: enable
- *Immersive View*: enable

6. When you start your meeting, click on the Live Transcript button in the tool bar, then click the button to enable Auto-Transcription. Participants can then click on the CC button to hide or display captions, and a transcript of the meeting will be saved.

Recording Settings

Recommended settings:

- *Local Recording*: Only option for Students. Personal preference for Faculty and Staff.
- *Cloud Recording:* enable
  Note: The Cloud Recording feature is only available to Faculty and Staff.
- *Record active speaker with shared screen*: enable
- *Record active speaker, gallery view and shared screen separately*: personal preference
  Note: When you choose this file type for cloud recordings, the shared screen recording will appear alongside the active speaker/gallery view.
- *Record an audio only file*: enable
  You'll receive an M4A file with a recording of the audio.

- *Save chat messages from the meeting / webinar*: enable
  Receive a TXT file with the transcript of in-meeting chat messages.

  Advanced cloud recording settings
- *Add a timestamp to the recording:* disable
- *Record thumbnails when sharing*: enable
- *Audio transcript: enable*
  Automatically transcribe your cloud recordings
- *Save closed caption as a VTT file*: enable
- *Allow cloud recording sharing*: enable
- *Viewers can see the transcript:* enable

This concludes the process of setting up your profile and preferences for the meetings you hold in Zoom.

Zoom Web Conferencing

To Schedule A Meeting in Your Zoom Room

1. Navigate to SJSU's Zoom web portal at sjsu.zoom.us and click **Sign In**

2. Log in using your SJSU SSO (Single Sign On) credentials, the same credentials as your Canvas log in. Do not log in with your email account.

3. Click on **Schedule A Meeting** link at the top of the web portal page or when in your **Meetings** tab.

Note: Zoom can host meetings with up to 300 participants.

Schedule A Meeting With A Set Date And Time

You can either schedule a meeting for a specific date and time or you can set up a recurring or "always available" meeting. Instructions for setting up a recurring or "always open" meeting are listed after step 12 in the section below.

1. Enter the **Topic** of the meeting (e.g. “204 Org Analysis Group”)

2. Select the date and time of the meeting

3. You may select a meeting duration, but nothing happens in the meeting if you go over time

4. Select your **Time Zone**

5. Leave **Recurring meeting** box unchecked

6. Meeting ID choose **Generate Automatically**

7. Leave Registration **Required** box unchecked

8. Security -At minimum your meeting will need a passcode and/or waiting room enabled

9. Leave Video-Host and Video-Participants options **off**

10. Leave **Telephone and Computer Audio** option selected

11. Optional:

- Select **Allow participants to join anytime** if you want to let participants enter the room before the host arrives. Otherwise, they will receive a message notifying them that they will enter once the host has entered the room.
- Recommended: Select **Mute participants upon entry**.
- You can name alternative hosts If you set up a meeting which might be hosted by another person (for example, student group meetings). Note that alternative hosts must be listed with their @sjsu.edu email addresses.

12. Click **Save**

Schedule A Recurring Meeting (includes “always available” meeting)

1. Enter the **Topic** of the meeting or course (e.g. “INFO 204-13 Information Professions”)

2. Select the date you want the meeting to begin

3. Check **Recurring meeting**

4. In Recurrence dropdown box, select **No Fixed Time**

5. Continue by following the steps listed in the section above, starting with step 6.

Inviting Participants to Your Meeting

After you have saved your meeting, you will see a screen with information about how add the meeting information to your calendar. There is also important information to share with those you will invite to participate.

1. To invite attendees, you can simply copy the link (indicated in the image below) and email or post it.

Alternatively, you can click **Copy invitation** then paste it in a separate email to participants. The invitation includes the meeting link, phone numbers to call in to the meeting if computer audio is not available, and the Meeting ID.

Also see "How Do I Invite Others to Join a Meeting?" on the Zoom support site.

Starting Your Meeting

1. Log into the SJSU Zoom portal

2. On the left side of the page, click **Meetings**

3. Find your meeting in the list and click **Start**

Meeting Tips For Hosts

- The Host (person setting up meetings) cannot have more than one meeting they created running simultaneously. For example, a student who created a meeting for a student chapter and a meeting for a class project will not be able to have both meetings going at the same time, regardless whether or not the Host is present in either.
- There is not an option in Zoom to send meeting reminders. Meetings may be added to calendar tools such as Outlook or Google calendars for reminders.

- To enable polling, whiteboard and annotation settings, file transfer, and the Away button (“Nonverbal feedback”), under the **Meeting Settings** tab in the menu box on the left side of the page, scroll down to **In Meeting Basic** to toggle settings on/off. Allowing Co-hosts to be created is recommended as a backup in case host loses connection; toggle on under **In Meeting Basic**.
- **Accessibility Compliance.** All Zoom sessions should have captioning enabled, *even if nobody ever requests them*. Check your dashboard settings. Under the **Meeting Settings** tab, scroll down to **In Meeting Advanced,** and make sure that the Closed Captioning features are toggled “on”.
- To enable breakout rooms, under the **Meeting Settings** tab, scroll down to **In Meeting Advanced** to toggle settings on/off.
- Hosts and co-hosts have most of the same in-meeting controls. Only a Host can create a co-host. Hosts and co-hosts can turn recording on and off, but participants must ask permission from the Host first before they can record.
- Hosts and co-hosts can launch polls and share poll results. Polls can be created before the meeting or on the fly; on the fly polls are created in the web portal, not the Zoom meeting window.

Securing Zoom Meetings

Zoom has made an important update to help make your meetings more private and secure. Before hosting your next meeting, check to see if you are running the latest version of Zoom or visit their download page to update to the latest version.

Resources

Here are some resources to help you learn how to safely and successfully host your next Zoom meeting.

- Securing Zoom Meetings At SJSU
- SJSU IT: Zoom FAQ – Use, Privacy, and Security
- Zoom Blog: Best Practices on Securing Your Virtual Classroom
- Zoom Blog: How to Keep Uninvited Guests Out of Your Zoom Event

Save and Share Zoom Recordings

Record a Meeting

As the “Host” you will be able to record the meeting by clicking the “Record” button in the meeting toolbar. However, if you join someone else’s meeting, you will need permission to use the “Record” button. The host can grant permission by clicking “More” next to a participant’s name on the participant list and selecting the “Allow recording” option.

Access Your Recordings

Recordings made in student rooms will be downloaded to the Host’s computer. By default, all recordings will be placed in a Zoom folder found in the following file path on these devices:

- PC: C:\Users\User Name\Documents\Zoom
- Mac: /Users/User Name/Documents/Zoom

Recordings made in faculty rooms can be downloaded locally and/or to the Cloud. Each recording can be kept or shared. To share a recording stored on the Host’s computer, upload the file to a streaming service such as Panopto, and then share the URL link with others. See details below.

Use the File Explorer (Windows) or the Finder (Mac) to locate your recording file. A list of different formats will be provided. Click the format you wish to see or hear. The mp4 is a video file which includes all audio, video and shared screen content.

Share Your Recording

At SJSU, all Zoom recordings to the cloud are automatically migrated to SJSU’s Panopto account and deleted from Zoom. Faculty and staff can save and share recordings using Panopto’s cloud storage. Any faculty that records *lectures* in Zoom, however, must migrate those recording from SJSU’s Panopto account to the iSchool’s Panopto account. This is an iSchool policy for any recordings that are meant to be preserved long term.

Students can share their recordings with others by using a cloud storage tool such as Google Drive (or to a free streaming service such as YouTube). SJSU students have unlimited storage available in their Google Drive accounts. The steps below outline the process of how to upload a recording to Google Drive and share it with others.

1. Locate the recording on your computer. (If necessary, refer to the preceding section of this page).

2. Create a “Zoom” folder in Google Drive. In the top-left corner, click **New**. Next, choose **Folder**.

3. Drag or upload the Zoom file stored on the computer into the new Google Drive folder.
4. To share the recording, click to select the file (**1**) and then click the button that looks like a person (**2**). Type the email address (**3**) of each person with whom you wish to share the link.
5. If you wish to share the link with more than just a few people, you can select the option to **Copy link** (**1**). The default setting for this option is to allow anyone at SJSU to view the file (**2**).
If you wish to allow access to people who use non-SJSU accounts, click **Anyone with the link**, this will allow access to anyone who has the URL for the file.

6. Click **Done** save your selection.

How to Migrate Your Zoom Recordings to iSchool Panopto

1. **Use your SJSUOne credentials and log into SJSU Panopto site here:** https://sjsu.hosted.panopto.com

2. **Click on *My Folder* in the left hand menu**, and then click on the My Recordings Folder.

3. **Make any needed edits before exporting the MP4 file**. Hover your mouse over the video and click the share icon, then click the outputs tab. Select type and quality, then click on the download option.

4. **Login to the iSchool Panopto account here** – https://sjsu-ischool.hosted.panopto.com/

5. **Click on *My Folder* in the left hand menu**. (You can create subfolders for different classes or kinds of videos if you want.) **Then click the Create button** in the upper left corner.

6. Use *Upload Media* option to upload the MP4 video file you just downloaded from the SJSU Panopto site:
7. Once your videos are finished processing you are able to make additional edits like changing the sharing permissions and requesting captions. Public/Unlisted is recommended.

8. Click on Captions to order captions. NOTE: If you've just uploaded the video, you will NOT see the option to request captioning until the automatic speech recognition is finished processing.

SJSU Panopto Folder Restrictions

You may want to double-check your SJSU Panopto Account to confirm your folder restrictions are set so that any recordings you inadvertently leave there can't be viewed by anyone. While you can leave your videos in SJSU Panopto account, you will eventually get emails reminding you to delete old recordings. (See the CSU Virtual Learning Student Privacy Rights.)

To restrict visibility of your recordings, go to My Folder and click on the Meeting Recordings Folder.

Then, click the cog wheel to edit:
Click on Share to confirm your Meetings Recordings folder has inherited the restrictions from your My Folder. If needed you can click *Change*:
When you click Change you can set this to restricted. In the case below, my folder is restricted. So all Zoom recordings that end up here are not visible to others at SJSU.

Zoom Desktop Client

If you have previously joined a Zoom meeting, the Desktop Client application Zoom Chat is probably already installed on your computer. To ensure that you are running the most recent version of Zoom, check out this quick tutorial on how to update Zoom on your computer.

Getting Started

1. Launch the Zoom Desktop Client application on your computer.

2. Click the option to the SSO (Single Sign-On) option.
3. You'll be asked to enter your domain – enter sjsu
4. Enter your ID and SJSUOne password. After DUO authentication, follow the prompts to open your Zoom desktop client.
5. Next you should see the desktop app (shown below). Once you have logged in, you will see the main dialog box as shown below. The default tab is Home.

Modifying Settings

To change your preferences for notifications of new messages:

1. Open the Zoom desktop app and click Settings cog in the upper right corner.

2. In the left menu, select Chat.

You will see a variety of settings related to notifications which you can change and save.

Home Computing Environment

Minimum Requirements

Please note that the School requires that prior to enrolling and starting the INFO 203 course all incoming students have computer access in their homes with the following minimum hardware, as well as home internet access:

- **Processor:**
  For PCs: Intel Core i3, Core i5, Core i7, Core i9, Itanium, Xeon, or AMD APU/Fusion (Bulldozer, Piledriver, Excavator, Steamroller, Bobcat, Jaguar, Puma or Zen/Ryzen).
  For Macs: Intel-based processors (Intel Core i3, Core i5, Core i7, Core i9), or Apple M1/M2/M3 ARM processors (M1, M1 Pro, M1 Max, M2, M3, M4).

- **Operating System:**
  - **For PC users: Windows 10 or Windows 11.**
    Important Note: *Windows 10 will reach "end of life" on October 14, 2025. Users will need to upgrade to Windows 11 prior to that date.*
  - **For Mac users: v13 (Ventura) or v14 (Sonoma) or v15 (Sequoia).**

  - **Chromebooks: Please note that Chromebooks are NOT supported.**
- **RAM: 8.0 GB – 16.0 GB**

- **Hard Drive: 100GB or greater. Solid State Drives (SSD) and "Fusion" drives are acceptable, and are recommended where possible.**

- **Storage and Backup:**
  - **Local Storage: External hard drives, USB Flash drives, and network-attached storage (NAS) options are strongly recommended.**
  - **Cloud Storage: Students may back up course-related materials to their SJSU Google Drive. For other cloud storage providers, please confirm that the provider has strong security in place to protect your data. For students using SJSU Google Drive, you may consider investigating the Google File Stream or Google Backup and Sync applications. Third-party applications are also available for syncing**

data to Google Drive. ***Important Note: We strongly recommend maintaining local backups of your data, in addition to any cloud-based backups.***

- Document Backups: Students are strongly encouraged to regularly back up critical documents (Word, Excel, PowerPoint, PDF, HTML files, etc).
- Automating Local Backups: For Windows users, third-party software programs are available that coordinate automatic backups of data to an external hard drive. For Mac users, the Time Machine feature will allow you to set up automatic data backups to either an external hard drive or a network-attached Time Capsule drive.

IMPORTANT NOTE: You are responsible for backing up anything you want to save from Canvas and other systems. If you have course work on Senna or another system, you are responsible for saving that. We strongly recommend that you keep extra backup copies of anything that might be needed for your e-Portfolio and that you back them up using one or more types of removable media. Additionally, you may back them up to cloud storage.

- **Audio: Integrated onboard audio or internal sound card or external USB sound card. External speakers recommended.**
- **Headsets: Students are required to have a headset with a microphone. USB or Bluetooth headsets are strongly recommended.**
- **Printing: Local or networked printer (inkjet or laserjet).**
- **Internet Connectivity: Access to a high-speed connection is required. Minimum requirement: 1.5 Mbps downstream. Recommended: 3 Mbps downstream, or greater. You can check your connectivity speed here.**
- **Two Factor Authentication: Students are required to have a smartphone that supports the free DUO Mobile App for two factor authentication login to the one.SJSU portal.**
- **Network Hardware: Any appropriate hardware for whatever type of Internet connection you have. For example: DSL modem, Cable-modem, Ethernet adapter, Mobile broadband card, MiFi (cellular WiFi base station), WiMAX modem, satellite dish, etc.**

SJSU Applications

Post-graduation access to SJSU applications, including Google/Gmail and Canvas:

Upon graduation, students will have access to SJSU applications (including their @sjsu.edu Gmail accounts) for 1 year. Students are responsible for migrating their content away from SJSU applications prior to the end of the 1-year grace period, *regardless of whether they receive a warning notice regarding discontinuation of account access*. Students are on their own, in terms of migrating their content away from SJSU applications. *Please note that these accounts are not handled by the School of Information. We have no control over this, and we have no ability to get items restored*.

Saving Coursework

> Please remember to save information and materials for your e-Portfolio prior to the end of the semester.

Please remember that students are responsible for saving all information and materials that you may need for your **MLIS e-Portfolio** or **MARA e-Portfolio** **prior to the end of each semester. Post-Master's Certificate students will need to save materials for the program outcomes assessment project to be completed in their final semester. Digital Assets Certificate-only students will also need to save materials for their digital portfolio competency project.**

This includes but is not limited to:

1. **Zoom Recording Information**

   For Zoom recordings that students create in their own Zoom rooms, the person who set up the meeting and recorded it will have the recording file saved on their own computer. If they wish to do so, they can upload it to their Google Drive as a back-up and also as a way to share the recording with others. Details are posted in this page Saving and Sharing Zoom Recordings

   For Zoom any recording made in a room that a faculty member set up, students can save the link to the recording after receiving it from the faculty member.

2. **Assignments**

   Students are responsible for retaining all work and documents related to

submitted assignments, as well as maintaining backups of such files.

3. **Documenting group project work via screenshots or screencasts**

   For courses, such as INFO 202 and INFO 242, students who wish to use their group's projects as e-Portfolio evidence must document them using screenshots or screencasts prior to the end of the academic term in which they are enrolled in the class. Screencasts may be recorded using tools such as Techsmith Capture.

4. **Blog Posts**

   How to export your blog to save the content:
   https://ischoolblogs.sjsu.edu/info/how-to/export

Canvas

Course Access

For any given semester, *course access terminates one month after the first day of the subsequent semester at 11:59 PM Pacific.* For example, upon the conclusion of the Spring 2018 semester, course access ended on 5 July 2018 because the first day of the Summer semester was 4 June 2018 (an extra day was given since 4 July was a holiday).

The School of Information cannot accept any requests to "re-open" access to a closed course for students who failed to save specific materials prior to the end of the semester, and/or who have experienced loss of their saved materials due to hard drive failure or other data loss situations. By general rule, course access ends one month after the first day of the next semester.

To avoid running into problems when it comes time to work on your e-Portfolio, you should:

1. **Save all materials and information that you may need for your e-Portfolio prior to the end of each semester.**

2. **Be sure to maintain local backups of your saved materials.**

Evidentiary Items

Examples of the types of items that could potentially be used as evidence in your ePortfolio are available on the handbook page, Examples of Evidentiary Items

Please note that this list is for illustration purposes only and is NOT intended to be an exhaustive list. MLIS students are encouraged to download the Student Success Planner workbook to organize their ePortfolio evidence.

Canvas Download Submissions Tool for Collecting Evidentiary Items

Canvas provides a tool which allows students to comprehensively download all submitted assignments for current and concluded courses. Please note that this tool does not include quizzes or graded discussion posts as part of downloaded assignments.

Note for Windows Users: If you are unable to open the downloaded zip file successfully, please try downloading and installing a third party Zip file opening application like 7-Zip in order to open the ZIP file.

If you are still having issues opening the downloaded ZIP file, please contact TC Truong.

Saving Quizzes and Discussion Posts

Quizzes and discussion posts must be saved manually by students. The best way to capture these assignment types are as screenshots (either in image or PDF format) and must be done prior to the closing of a course.

Using the Canvas ePortfolio to Save Graded Assignments Before INFO/MARA 289

Students who save graded assignments using the Canvas ePortfolio software before enrolling in INFO/MARA 289 will not be able to utilize these ePortfolios. These assignment lockers cannot be used in INFO/MARA 289 and are only useful for the student's own record-keeping within the Canvas system.

INFO/MARA 289 students will be required to use the Canvas Download Submissions Tool detailed in the section above in order to use previous assignments as ePortfolio artifacts.

If students would like to use graded submissions or instructor comments as ePortfolio artifacts, they will need to either take screenshots of these interfaces or save these pages as PDFs.

Student Data from Previous iSchool Learning Management Systems

Students who used a previous iSchool learning management system (LMS) — like D2L or ANGEL — will not be able to access any evidentiary items from those LMSs as access to the those systems and their corresponding course sites terminated upon our move to our current LMS, Canvas.

Software Downloads

Also see Application Software Requirements.

Downloads

- **Wireshark Students in the Cybersecurity program may need this for class assignments.**
- **Nmap Students in the Cybersecurity program may need this for class assignments.**
- **Adobe Reader DC You need this to read PDF files.**

iSchool Alert and Email Lists

The iSchoolAlert notification system is used to distribute information to the iSchool student community.

All active students are automatically added to iSchoolAlert and will periodically receive important administrative information via iSchoolAlert. All members of the iSchool student community are required to remain on iSchoolAlert.

Please make sure that your e-mail address in MySJSU is current, as that will be the e-mail address at which you receive information sent via iSchoolAlert. Also, please make sure to allow e-mail from the following address through your Spam/Junk filter: ischool-alert-group@sjsu.edu

iSchoolAlert is also a tool we use to help build local communities of iSchool students. It allows e-mails to be sent to iSchool students in any particular geographic area. When an activity such as a library tour, a conference reception, or a professional event is scheduled, an alert can be e-mailed to all iSchool students within a defined radius (up to 100 miles).

Submit an iSchoolAlert Announcement

Would you like to invite iSchool students to attend an upcoming event? Submit the information to us and we can distribute it to the students who live in the area where the event will be held.

Opt-out

If you want to opt out of the iSchoolAlert notifications, use the iSchoolAlert Opt-out form.

IMPORTANT: Please note that all currently-enrolled students are required to remain on iSchoolAlert. Students who choose to opt out will still be liable for any information missed as a result of opting-out.

Questions

If you have questions about iSchoolAlert, contact Abigail Laufer.

Wordfence

Support for Wordfence login questions and issues

The School of Information uses the Wordfence security program across our extensive WordPress infrastructure. This site is intended to provide support for students and faculty who have Wordfence-related issues or questions when logging into WordPress.

Two-Factor Authentication: For users who are new to Two-Factor Authentication (2FA), we strongly recommend that you review all of the articles below for instructions on how to set up 2FA for your iSchool WordPress account(s). 2FA is now mandatory for all iSchool WordPress users.

Overview of Two-Factor Authentication (2FA)

The School of Information is now requiring 2FA (Two-Factor Authentication) for all WordPress sites. Specifically, the security software that we use, called Wordfence, requires "TOTP" authentication (Time-based One-Time Passwords) through one of the following apps:

- **Duo**

- **Google Authenticator**
- **FreeOTP Authenticator**
- **1Password (mobile and desktop versions) See: 1Password help**
- **LastPass Authenticator**
- **Microsoft Authenticator**
- **Authy 2-Factor Authentication**
- **Any other authenticator app that supports Time-Based One-Time Passwords (TOTP)**

If you are already using one of the above apps, then you will be able to use your existing authentication app to log into iSchool WordPress sites using TOTP. It is very likely that you are, at least, already using Duo for SJSU SSO sign-on, and consequently you can use Duo for iSchool Wordfence sign-on as well.

CRITICAL NOTE: We strongly suggest that you utilize the "Backup Code" feature mentioned below, and download a set of backup codes when setting up 2FA for your WordPress account.

What is 2FA?

"Two-factor authentication" is an additional login security feature that is used by banks, government agencies, and the military worldwide. It is also increasingly becoming standardized as a "best practice" across all industries. It is one of the most secure forms of remote system authentication. This method of logging in to your site relies on *something you know* and *something in your possession*. That is why it is referred to as "two-factor" because two factors are involved in authenticating you.

In this case, you know your password and you are in possession of your cell phone or another authenticator device. If we can verify both of these, then we know that it is okay to allow you to access your site.

How to enable two-factor authentication

In Wordfence, two-factor authentication uses an authenticator application for better security and reliability, instead of SMS text messages or emails.

First, choose an authenticator application to use, if you do not already have one installed on a cell phone or tablet. Choose from the list of TOTP apps mentioned above. As discussed, if desired you can use Duo for this purpose, since you are already using Duo as part of your SJSU experience.

After installing your preferred 2FA app on your mobile device, do the following in order to enable 2FA for your iSchool WordPress account:

For Subscribers and Editors:

1. Log into WordPress in the normal way.

2. After logging in, you'll be taken to your user profile page, and you'll see the following prompt at the top of the page:

3. To proceed with 2FA configuration, you can either click on the "Configure 2FA" link included in the above prompt, or you can click on the "Login Security" link on the left navigation menu:
4. On the "Login Security" page, you'll see the following items:

5. Open your authenticator application on your mobile device and add a new entry. Most apps have a plus sign symbol or a tiny QR code symbol.

6. Use your authenticator app to scan the QR code on the "Login Security" page:

7. Your authenticator application should then display a six-digit code. Here is an example of what the entry looks like in the Duo authentication app after you have added an entry for the WordPress site in question:
8. Next, in the "Download recovery codes" section, click the "Download" button. This will allow you to download your recovery codes. Recovery codes can be used if you lose your mobile device that has your authenticator app. Print or save the file with your recovery codes, and store it in a safe place:

Important Note: It is very important that you do not skip this step. Although the recovery code section states that it is optional, we would like to emphasize that it is an extremely important step and we do NOT consider it optional.

8. Finally, in the "Activate" field, enter the six-digit code that is currently being shown on your authenticator app, and then click on the "Activate" button. This completes your Wordfence 2FA enrollment for the WordPress site in question:

9. From now on, after you successfully log into the WordPress site, you will receive the following additional prompt:

At that prompt, enter the six-digit code that is showing in your authenticator app, and then click on the Login button. The six-digit code changes every 30 seconds. If the code expires, you can enter the next code instead.

Note: If this is your first time setting up two-factor authentication on a site then you may want to try logging in to the site in a different browser, or in a private or incognito browser window, to check for any compatibility issues before logging out.

FOR ADMINISTRATORS:

The 2FA enrollment process is the same for administrators, except for the location of the "Login Security" menu. Administrators will need to click on the "Wordfence" link on the left navigation menu, and then click on the "Login Security" option:

Important Note: The School of Information IT Team issues administrator privileges to specific faculty and staff with a level of implicit trust. We ask that administrators DO NOT access or change any of the site-wide Wordfence settings that the School of Information IT Team has configured. Should you do so, it is grounds for revocation of administrator privileges. Thank you for respecting this policy.

How to log in with two-factor authentication

1. Enter your username and password and press the "Log In" button.

2. When the "2FA Code" prompt appears, enter the code from your authenticator application.

3. If you use two-factor authentication for multiple sites, be sure to pick the correct site.

4. Press the "Log In" button.

Quick Login

If you prefer a slightly quicker method, or if you do not see the "2FA Code" prompt, you can also enter a two-factor authentication code directly after your password, in the same field:

1. Enter your username and password, but do not press the "Log In" button yet.

2. Immediately after your password, enter the code from your authenticator application. For example, if your password is w0rdf3nce#! and the code is 233455 then enter w0rdf3nce#!233455

3. Press the "Log In" button.

How to use recovery codes

The recovery codes that you saved or printed during setup can be used if you ever lose your authenticator device, if you remove the application, or you remove your site's entry by mistake. Make sure that you store these codes in a safe place.

Because they do not expire, recovery codes are longer than normal codes. They are 16 letters and numbers instead of only 6 numbers, but each code can only be used once. An example recovery code looks like 5199 5c24 77dc 0ed7.

The log in process is the same as using a code from an authenticator application:

1.Enter your username and password and press the "Log In".

2. When the "2FA Code" prompt appears, enter a recovery code. (Remember that recovery codes are longer than regular two-factor authentication code).

3. In this example, we would enter 5199 5c24 77dc 0ed7.

4. Press the "Log In" button.

Each recovery code can only be used once. You can generate new recovery codes on the "Login Security" page of your site. This is useful if you have used most of your codes, or if you lose the codes you previously saved or printed. Generating new codes will invalidate the previous codes.

Grace Period and Deactivating 2FA (which is disallowed)

When we initially set up Wordfence for a particular WordPress site, users will be given a 30-day "Grace Period" to activate 2FA on their WordPress account. If users fail to activate 2FA within the Grace Period, then their account will be automatically locked, requiring administrative intervention. In such a case, you will need to use the iSchool Tech Support Form to report your issue.

Because of the overall workload, lower priority will be given to trouble tickets for users who failed to set up 2FA within the 30-day Grace Period.

Once you have activated 2FA for your WordPress account, you will notice that there is an option to "Deactivate" 2FA. This is disallowed by policy, as all users need to keep 2FA enabled for their account. If you attempt to deactivate 2FA after the 30-day Grace Period has ended, then your WordPress account will automatically be locked and will require administrative intervention to unlock.

What if I lose or change my mobile device with the authenticator app?

If you lose or change your mobile device that has the authenticator app, then you'll need to submit the iSchool Tech Support Form and report the issue. One of the iSchool WordPress IT Administrators will need to temporarily deactivate 2FA on your account, and you'll then have to re-enroll in 2FA using your new mobile device.

What should I do if my account is locked out?

Scenarios #1 (*too many unsuccessful login attempts*): If you are locked out of your account after five unsuccessful logins, then you will need to wait 30 minutes before trying again. This is a temporary lockout that will resolve itself after 30 minutes. In this scenario, you will have received a "block page" that says the following:

"*You have been temporarily locked out of the system. This means that you will not be able to log in for a while.*"

Scenario #2 (*2FA-related lockouts*): If your account is locked out because you did not enable 2FA within the 30-day Grace Period, then you will need to contact iSchool IT Support using the information listed in the "Obtaining additional support" section below.

Likewise, if your account is locked out because you deactivated 2FA for your account after the Grace Period has ended, then you will need to contact iSchool IT Support using the information listed in the "Obtaining additional support" section below.

2FA for WordPress Multisite

For the following WordPress Multisites:

a. School of Information Community Site
b. INFO 280
c. BSISDA Demissie

the process is similar. After logging into WordPress, go to one of your sites and click on "Login Security" in the left-hand navigation menu. From there, you will be able to complete the 2FA enrollment as specified above.

Obtaining additional support

If the above information does not meet your needs, then please complete the iSchool Tech Support Form and tell us more about what you are experiencing that is not covered in the above instructions. Please be sure to select the WordPress option on the iSchool Tech Support form to ensure that your ticket is routed appropriately.
