iSchool MLIS+ Mentored Library Fellowship

The all-new MLIS+ Mentored Library Fellowship for Success program at San José State University offers both in-person and virtual work experience fellowships for currently enrolled students in the School of Information's Master of Library and Information Science program who are residents of California. This program is open to California residents who are either Regular Session and Special Session MLIS students.

The innovative MLIS+ Fellowship program was developed in collaboration between the SJSU College of Information, Data and Society; the School of Information; and the Dr. Martin Luther King Jr. Library as a way to address the critical need for well-qualified, diverse library professionals.

Through an extended-length paid fellowship, MLIS students will gain the practical experience and mentorship necessary to thrive in their post-graduate careers. By immersing students in real-world library environments and providing them with mentorship, the MLIS+ Fellowship program will not only enhance their professional readiness but also bring fresh perspectives and skills to the libraries they serve.

Paid Work Experiences

The MLIS+ Fellowship program will offer longer-term, paid work experiences with structured mentorship, accessible to MLIS students who are California residents, whether in-person or virtually. The program aims to equip students with the skills and experience necessary for successful careers in academic libraries while providing library organizations with access to a well-prepared pool of future professionals.

Fellows will gain valuable library work experience, which will make them more competitive in their job searches after graduation. They will have the opportunity to apply theoretical knowledge in practical settings under the mentorship of an experienced professional, who will enrich the student's learning experience. The talented MLIS students will contribute to real-world library operations and infuse their host library with new energy and ideas.

Admissions Requirements – MLIS+ Fellowship

Thank you for your interest in the MLIS+ Mentored Library Fellowship for Success program. In order to be eligible to participate in this program, MLIS+ applicants must:

- Be matriculated in the SJSU iSchool MLIS program in either the Regular or Special Session;
- Be a resident of California;
- Have successfully completed INFO 200;
- Must be enrolled in 6 units each term;
- Have at least 12 months remaining before graduation.

Accepted students will work up to 15 hours per week for 18 months as paid fellows at the Dr. Martin Luther King Jr. Library – either in person or virtually, depending on the fellowship opportunity and the student's location.

How to Apply – MLIS+ Fellowship

Applications Closed August 31, 2025

Interested SJSU iSchool MLIS students must submit the following to be considered for this program:

- **CV or Resume:** A current and complete CV that includes your permanent address, earned educational degrees and relevant professional experience;
- **Letter:** 1,000 words describing your enthusiasm for librarianship, relevant academic and professional experience, why you are a strong candidate for the fellowship, and your future career goals. Also, include the name of the worksite you are interested in applying for;
- **INFO 200:** Evidence of successful completion of (or date when you expect to complete) INFO 200;
- **Recommendation Letters:** Two letters of recommendation from faculty and/or professionals who have knowledge of your academic or professional abilities;
- **Transcripts:** Transcripts should show all earned degrees, with GPA indicated. Official transcripts are not needed at this stage. Do not send transcripts for courses taken if no degree was earned.
- **Declaration** that you are a resident of California.
- **Zip file naming protocol:** YourName_Name of FellowshipPlacement.zip

Deadline to Apply

Please submit all of the application materials. **DATE August 31, 2025** Upload a zip file format (max file size 10MB) using this form:
https://ischool.sjsu.edu/mlis-fellowship-application-form

Mentorship – MLIS+ Fellowship

A key component of the MLIS+ Mentored Library Fellowship for Success program is the formal mentoring provided by both the library supervisor and the program coordinator, which is essential for ensuring student readiness and success.

Mentorship will involve regular interactions with library supervisors, offering opportunities to develop professional skills, engage in library operations, and receive career guidance.

Additionally, the program coordinator will facilitate informal mentoring through virtual meetups, group discussions, and opportunities for students to present their work (e.g., poster sessions and webcasts) fostering a supportive cohort experience.

Worksites – MLIS+ Fellowship

The worksites for the MLIS+ Fellowship program will be held at the Dr. Martin Luther King Jr. Library on the SJSU campus. Some worksites will be remote.

In the application letter please indicate the name of the worksite you wish to be considered for.

‘South Asians in Silicon Valley’ MLIS+ Fellow - Location: IN-PERSON AT SJSU

The worksites for the MLIS+ Fellowship program will be held at the Dr. Martin Luther King Jr. Library on the SJSU campus. Some worksites will be remote

The South Asians in Silicon Valley (SASV) initiative at the SJSU King Library records, preserves, and showcases the impact and legacies of the vast South Asian diaspora in the Bay Area/Silicon Valley. Through exhibits, events, and conversations, this initiative connects South Asian community leaders and the SJSU campus and invites everyone to learn about the impact of an immigrant community.

South Asians in the Bay Area include people with family origins in Afghanistan, Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan, and Sri Lanka.

The SASV Fellow will participate in various aspects of the initiative, including but not limited to:

Conducting background research for exhibits and events

Traveling with mentor to collect artifacts for exhibits

Developing virtual exhibit and installing physical exhibit

Participating in events, from planning, research, coordination, and execution to assessment

Updating website of initiative and working with the Omeka platform for digital exhibits

Participating in meetings, as needed

Writing for journal article or conference presentation or other forms of dissemination about the initiative

Overall, the Fellow will gain a range of experiences and skills in helping build a unique initiative.The Fellow will also meet community leaders and work closely with other librarians, students, faculty, and staff of SJSU.

AI Literacy MLIS+ Fellow - Location: IN-PERSON AT SJSU

The AI Literacy Fellow will support emerging initiatives focused on artificial intelligence, information literacy, and responsible AI usage within the San José State University Library. Working under the guidance of the Artificial Intelligence (AI) Librarian, the fellow will assist in developing AI literacy resources for students, faculty, and staff. This includes instructional materials, online learning tools, and support for library workshops and information literacy sessions. The fellow will also contribute to the creation of an adaptable AI literacy framework, informed by workshop outcomes and research insights, while also examining existing AI frameworks for alignment. This position will work towards a literature review of instructional use cases and strategies.

This position is ideal for students interested in AI librarianship, teaching, information literacy, and the ethical integration of AI in education and information science. The fellow's contributions will help shape AI instruction at SJSU and strengthen campus-wide information literacy in the age of generative AI.

Health Sciences MLIS+ Fellow – Location: REMOTE (Some in-person possible @ Fellow's Request)

The Health Sciences MLIS+ Fellow will work under the direction of library faculty at SJSU to provide teaching and research support to health sciences faculty. This position provides an excellent opportunity for iSchool students curious about a career in academic librarianship as a liaison to medicine, nursing, public health, or related fields to gain hands-on experience conducting evidence synthesis research in a supportive academic environment. The Fellow will assist faculty in the collection and evaluation of research data and will be involved with the creation and evaluation of online learning objects. Other projects may be assigned, depending on the interests and qualifications of the successful applicant.

Essential Functions:
Under the guidance of two experienced health sciences librarians, the fellow will:
* Read articles to familiarize themselves with the project methodology;
* Participate in biweekly or monthly Zoom meetings with a multidisciplinary, multi-institutional research team;
* Assist with data collection and literature reviews;
* Perform article screening and data extraction;
* Assist with basic data analysis;
* Create basic data visualizations; and
* Contribute to manuscript development.

Other duties may be assigned.

Required:
* Ability to learn new software and research techniques as needed.
* Ability to work without direct supervision, paying close attention to detail and bearing independent responsibility for data accuracy.
* Self-motivation and a high level of responsibility to complete tasks in a timely manner.
* Ability to adhere to relevant guidelines for research and follow appropriate ethical research practices.
* Strong verbal and written communication skills.
* Reliable access to internet and computer equipment needed to participate in Zoom meetings.

Preferred:
* Experience conducting literature searches in library databases or working on research projects.
* Knowledge of evidence synthesis methodologies, such as systematic reviews.
* Interest in academic health sciences librarianship or related specialized subject area.
* Proficiency with office and research software and applications, such as Google Docs, a citation manager like Zotero, and Covidence.

FAQs – MLIS+ Fellowship

1. **Q. What is the difference between an internship and a fellowship in the MLIS+ program?**
A. An internship is typically a short-term, often unpaid or for-credit opportunity that allows students to gain practical experience in a specific field. Internships are usually part time and may not include structured mentorship. In contrast, the MLIS+ Fellowship is a longer-term, paid position that offers structured mentorship. Fellows engage in substantial projects, receive guidance from experienced professionals, and are integrated into the host library's operations. This immersive experience is designed to prepare students for successful careers in academic libraries.

2. **Q. Who is eligible to apply for the MLIS+ Fellowship?**
A. Applicants must be residents of California and enrolled in the Master of Library and Information Science (MLIS) program at San José State University. Both Regular Session and Special Session students are eligible to apply. Students must have at least 18 months remaining before graduation and must be enrolled in at least 6 units each term.

3. **Q. Where are the MLIS+ Fellowship positions located?**
A. Fellowship positions are available in both on-site and virtual formats, depending on the host library's setup and needs. On-site fellowships may take place at partner academic libraries across the United States. Virtual fellowships allow students to participate remotely, which can be ideal for those who are not in proximity to a partner institution or prefer a flexible, online arrangement. Applicants are encouraged to review the descriptions of available placements during the application process to determine which options match their preferences and location.

4. **Q. How do I apply for the MLIS+ Fellowship?**
A. Please see this web page: https://ischool.sjsu.edu/mlis-library-fellowship-how-apply

5. **Q. What is the duration of the MLIS+ Fellowship?**
A. This is a 12-month fellowship that allows fellows to engage deeply with their host library and complete meaningful projects. (A 12-month fellowship may be extendable and renewable.)

6. **Q. Is the MLIS+ Fellowship a paid opportunity?**
A. Yes, the MLIS+ Fellowship is a paid position. Fellows receive compensation for their work, which not only supports them financially but also recognizes the value of their contributions to the host library. Fellows are expected to work between 10 to 20 hours per week.

7. **Q. What kind of mentorship is provided during the fellowship?**
A. Fellows receive formal mentorship from both the library supervisor at the host institution and the program coordinator at SJSU. This mentorship includes regular meetings, guidance on professional development, and support in navigating the academic library environment. Additionally, the program offers informal mentoring through virtual meetups, group discussions, and opportunities for fellows to present their work, fostering a supportive community.

8. **Q. Are fellows expected to present at conferences?**
A. Yes, fellows are encouraged to present their work at conferences, webinars, or other professional forums. This experience helps develop their presentation skills, enhances their professional profiles, and contributes to the broader academic library community.

Information for Employers – MLIS+ Fellowship

Partnering to Develop the Next Generation of Library and Information Leaders

The MLIS+ Fellowship Program offers host institutions the opportunity to partner with the College of Information, Data, and Society – School of Information in shaping the careers of outstanding Master of Library and Information Science (MLIS) students. Through meaningful placements, your organization can benefit from fresh perspectives, advance ongoing initiatives, and contribute to professional development across the field.

Host Organization Responsibilities

1. Identify a Worksite and Mentor

Participating organizations must:

- Designate a physical or virtual worksite or worksites suitable for a 12-18 month fellowship. (A 12-month fellowship is extendable and renewable.)
- Provide a dedicated mentor who can:
    - Guide the fellow's regular work and special projects;
    - Offer professional development support and career advice;
    - Collaborate with the fellow, where possible, on projects.

2. Compensation

Organizations agree to employ the fellow at $20/hour. Fellows work 10–20 hours per week during the appointment, up to 1,000 hours per 12 months.

3. Submit Employer Agreement and Worksite Description

Employers must complete and submit a Host Organization Agreement Form.

A detailed description of the proposed worksite(s) and expected duties are required.

Submissions must meet the August 15, 2025 deadline to be considered for inclusion in the upcoming cohort. Submissions will be considered on a rolling submissions basis before August 15.

Fellowship Appointment Cycle

MLIS+ Fellowships begin in the fall and spring semesters. The timeline for employer participation is as follows:

Worksite Submission Period - Employers submit agreement forms and worksite descriptions.

Program Advertising - MLIS+ Fellowship program is promoted with a list of approved worksites and duties.

Rolling Application Deadline - Prospective fellows apply for their preferred worksite.

Application Review - Prospective fellows' applications are vetted by the Fellowship Coordinator and then forwarded to host organizations for review.

Fellow Appointments - Fellows are selected and notified of their appointments.

Orientation - Orientation sessions are held for both mentors and fellows. Exact dates will be published prior to each appointment cycle.

Ready to Participate?

Organizations interested in hosting an MLIS+ Fellow should complete this form. Please contact the MLIS+ Fellowship Coordinator (susan.alman@sjsu.edu) for the latest forms and guidelines.

We welcome your partnership in shaping the future of libraries and information services.

Student Assistantships

Graduate students admitted for the MLIS or MARA degree programs at the San José State University (SJSU) School of Information are eligible each semester for a variety of paid student assistantships that involve working with faculty and staff on different projects. Some examples of projects and tasks that student assistants have worked on include:

- Supporting faculty research projects, including assisting with data collection and analysis, as well as sharing results via publications and presentations
- Building learning spaces and coordinating virtual conferences in Second Life
- Manuscript editing
- Researching exemplary practices
- Developing literature reviews
- Writing Community Profiles for our school's website
- Writing content for the school's News announcements and iStudent Blog
- Serving on the school's web team
- Helping to coordinate the school's social media outreach strategies
- Supporting the school's learning management system administrator
- Supporting efforts to develop and promote new virtual internship opportunities

> Student assistants must have CA residency to apply. The current rate is $20 per hour. Graduate Student Assistants must be enrolled in 4 units (200 level classes) and Undergraduate Student Assistants must be enrolled in 6 units.

Learn more about these opportunities by reading Community Profile stories about students who have served as student assistants.

When openings become available, student assistantship opportunities will be posted via the iSchoolAlert notification system

iSchool Internships

Our school's MLIS and MARA graduate students and Post-Master's Certificate students are strongly encouraged to complete an internship (we offer on-site and virtual internship opportunities) to gain both valuable real-world **experience** and **course credit**. Internship supervisors collaborate with our faculty to provide rich, structured field learning experiences for our students in a variety of professional settings. As interns gain new skills, explore career options, and expand their professional connections, they also participate in a two-way exchange of knowledge with their internship site.

Students can browse or search for internship opportunities. Site supervisors can update or create new listings in the Internship Sites Database.

Students can view the most recent internship opportunities on the Recently Updated Listings page.

MLIS and Post-Master's Certificate students: Please go to the INFO 294 Student Handbook.

MARA students: Please go to the MARA 294 Student Handbook.

Employers: Please go to the Internship Site Supervisor Handbook.

If you have general internship questions, contact Dr. Mary Ann Harlan, associate director.

Internship Stories e-Book

Whether you have work experience or not, completing an internship while studying at the iSchool is a wonderful way to build skills, expand your network, try new things, and boost your resume.

Internships are optional but highly encouraged. Students who have completed internships reap the benefits of this additional real-world experience. Even if time is an issue or you're already working in your desired career, an internship can open doors that you haven't yet imagined.

We invite you to read Opening Doors: Student Internship Stories.

Every internship was so unique and different. I have enjoyed all of them immensely and have learned so much about the uniqueness and expansiveness of the information profession. – Joy Kim, ’18 MLIS

INFO/MARA 294 Professional Experience: Internships

Student Checklist – Setting Up an Internship

Important Deadline and Contact Information:

- INFO 294: Start investigating internships at least one term prior to when you want to be doing the internship and be enrolled in INFO 294. This will give you sufficient time to review internship opportunities and find the one that's right for you.
- MARA 294: Students must work with the MARA internship faculty supervisor during the spring semester before their final year to determine if the internship experience is right for them.
- Post-Master's Certificate students must have completed INFO 203.
- You must have already identified, applied to, and been accepted by the internship site **before** submitting the Professional Experience: Internship – Student Application. Your information will be sent to the appropriate iSchool internship supervisor.

- It would be best to target some time around **4-6** weeks prior to the start of classes to submit your application to the iSchool internship faculty supervisor for review. We understand this may not always be possible, but the more lead time the better.

IMPORTANT: Please read the INFO 294 Student Handbook or the MARA 294 Student Handbook to familiarize yourself with the details of the internship process and experience. This checklist is only a summary.

Checklist Instructions: Review each task for more information. When a task has been completed, you can check it off. Your completed items will remain checked when you return to the form in the future (if you are using the same computer and browser and have not cleared your browser cookies). You may wish to bookmark this page.

Eligibility, Preliminary Decisions, and Information
○ INFO 294: MLIS students must have completed INFO 200, 202, 203, 204, and at least 9 units of electives for a total of 19 completed units before the start of the semester in which they participate in an internship. ○ Post-Master's Certificate students must have completed INFO 203. ○ MARA 294: Students must have completed MARA 200, 204 & 6 courses before the start of the semester in which they participate in an internship. ○ You must be in good academic standing (3.0 GPA or above and no outstanding incompletes). ○ The internship site may require that certain courses be taken before the internship begins. Review internships requirements in the iSchool Internship Listings Database. ○ Review additional rules in the INFO 294 or MARA 294 Student Handbook.
○ Select the internship that is right for you. ○ Do you prefer an on-site or virtual position? ○ Do you prefer an archival/records or non-archival/records position?

		○ Review the iSchool Internship Listings Database to see what opportunities are available.
		○ How many units will you take? ○ MLIS students can take 2 units (minimum of 90 hours of work), 3 units (minimum of 135 hours of work), or 4 units (minimum of 180 hours of work). Some internship sites will only take students for a certain number of units/hours, so be aware of specific site requirements. ○ Post master's students can take 3 units (minimum of 135 hours of work). ○ MARA students must take 3 units (minimum of 135 hours of work).
Select, negotiate, and apply for the internship with the site supervisor		
		○ Select an internship from the iSchool Internship Listings Database. ○ If you don't see an opportunity that's right for you, you can create your own internship, but it must meet iSchool internship requirements to be taken for credit. See the Custom Internship section for more information.
	Create a rough draft of Learning Outcomes to review with the prospective internship site supervisor. (Guidelines are the same for INFO 294 and MARA 294.)	
		○ Contact the site supervisor of the internship you're interested in. (Guidelines are the same for INFO 294 and MARA 294.) ○ Follow the application instructions provided on the internship listing. ○ If you are contacted for an interview, review the opportunity and activities, share your expectations and understand the site supervisor's expectations. ○ Review your draft Learning Outcomes with the site supervisor. ○ Discuss the hours/number of units that you'd like to work. ○ If you're comfortable with the opportunity and the site supervisor, and have not already formally applied for the position, do so.

	Receive and accept a verbal or written offer for the internship from the site supervisor.
Apply for the internship through the iSchool	
	○ Complete the Professional Experience: Internships – Student Application. ○ If you set up a new internship that is not listed in the iSchool Internship Listings Database, you will not be able to apply to take it for credit (INFO 294/MARA 294) until the new internship site has signed the University agreement and set up its internship in the iSchool Internship Listings Database.
	○ The appropriate faculty supervisor will contact you to approve your application and instruct you to enroll in a specific section of INFO 294 or MARA 294. ○ Do not start working any hours for your internship until the appropriate faculty supervisor confirms approval of your internship.
Contact Site Supervisor	
	○ Contact your site supervisor once your internship is approved. ○ Review the final Learning Outcomes, hours, and specific tasks/activities/projects you will complete as part of your internship. ○ Set a date for your first official meeting during the internship semester.
Register for INFO/MARA 294	

		When the faculty supervisor confirms approval of your application form http://ischoolapps.sjsu.edu/internships/new/apply_new.php you will be told which section of INFO 294 to register for on my.sjsu.edu -and given a permission number.

INFO 294 Student Handbook

INFO 294, Professional Experience: Internships, gives students the opportunity to gain valuable professional work experience under the supervision and guidance of information professionals in the field while pursuing defined learning outcomes and earning course credit towards their degrees. It is designed to provide students an opportunity to test theories and to apply skills learned in other courses taken during the MLIS program. This Internship course (INFO 294) can also be taken as one of five electives by students in the Post-Master's Certificate program.

Internship opportunities can be on-site (an intern physically works at an organization) or virtual (an intern works online on directed projects) or a combination.

In addition,

- MLIS students must have completed INFO 200, 202, 203, 204, and at least 9 units of electives for a total of **19 completed units before** the start of the semester in which they participate in an internship.
- Internships can be paid or unpaid.
- Internships require a minimum of 90 hours (for 2 units), 135 hours (for 3 units) and 180 hours (for 4 units) completed by the end of the semester.
- Internships are graded credit/no credit INFO 294 courses.
- Students can enroll in only one internship during a semester. The internship must be completed **within** the semester for which it was approved for academic credit.

- INFO 294 internships are repeatable for a maximum of 8 units of credit towards the MLIS degree.
- INFO 294 internships can be taken only once for a maximum of three units towards the Post-Master's Certificate.
- Students may not participate in internships at their regular place of employment.
- Students may not choose the same internship site twice.
- Students may not concentrate internship hours during the semester—work must be completed consistently throughout from week to week.

Eligibility and Deadlines — INFO 294

Eligibility

An MLIS student must have

- **completed** INFO 200, INFO 202, INFO 203, INFO 204, **and** at least 9 units of electives for a total of at least **19 completed units** by the semester **before t**he internship starts;
- be in good academic standing (3.0 GPA or above);
- and have no outstanding incompletes

.
A Post-Master's Certificate student must have completed INFO 203.

In addition, the internship site may require that certain courses be taken before the internship begins.

Deadlines

A student should identify an internship, apply to the internship site, be accepted, identify learning outcomes with the internship site supervisor, and submit the Professional Experience: Internship - Student Application form to the faculty supervisor **no later** than 1 week **before** classes for the semester of the internship start. Ideally earlier.

Choosing an Internship — INFO 294

Students can search the iSchool Internship Sites Database for currently available and upcoming internship opportunities. Internship listings provide information on desired qualifications, application procedures, and deadlines. Students may search for internships based on task (archival, non-archival), work to be done (virtual, on-site), pay status (paid, unpaid), location, and other factors.

Some internships have a formal internal application process and deadline. If so, it is the student's responsibility to apply in a timely manner so that decisions may be made by the internship site in advance of registration dates for that semester.

Creating a Custom Internship — INFO 294

Students may identify a new internship that more directly relates to their professional interests and goals by contacting an internship site that is unlisted. Potential internship sites sometimes advertise opportunities on job sites or through listservs. These may or may not meet the requirements for a iSchool credit internship. Please make sure the internship site and the site supervisor are aware of and will comply with the requirements for a INFO 294 credit internship (see Internship Site Supervisor Handbook – Eligibility and Guidelines). Also if an internship is **unpaid** the internship site will have to sign a University Organization Agreement.

To create a custom internship, please follow these steps:

- Ensure you have fulfilled the following prerequisites: GPA 3.0 or above, no incompletes, and 19 credits earned **before** the semester in which you intern.
- Be sure that both you and the site supervisor are aware of and fulfill your respective responsibilities
- Connect Dr. Mary Ann Harlan with the internship site supervisor contact information so that she can follow up to see if the site is willing to sign a University Organization Agreement (if unpaid) and follow the steps outlined **here.** A site **cannot be approved** to host an unpaid intern for credit unless this agreement is signed **This step should not be handled by a student. Provide the contact e-mail address to Dr. Harlan and she will follow up. Note: Getting an agreement signed can take several weeks so be sure to start the process for a custom internship at least 8 -10 weeks before you want to undertake the internship**

- **Site supervisors must:**
  - Develop an internship job description. They can look up a similar internship listing in the iSchool Internship Listing Database to use as a guide for creating the custom internship job description.
  - Be willing to follow the steps outlined here.
  - Be familiar with their responsibilities as outlined in the Internship Site Supervisor Handbook.
- **Students must**:
  - Write your Student Learning Outcomes (SLOs) to fit the job description and your learning goals. Be sure your site supervisor understands and agrees to the SLOs. You may need to make adjustments based on their input. SLOs should not be broad and overarching but address the **specific day-to-day job duties.**
  - Once the listing is in the iSchool database and you have applied and been accepted, you will complete the iSchool internship application form for the course. Your iSchool internship application will be reviewed by the appropriate iSchool faculty supervisor, and he or she will contact you with questions or approval. If approved the faculty supervisor will tell you which internship section to register for on my.sjsu.edu and will provide a permission number.
  - Register for the course and work the required number of hours per credit, that is, 90 hours for 2 credits, 135 for 3, or 180 for 4.
  - Complete all work between the first day of the term and the last.
  - Pace hours evenly over the number of weeks—10 in summer and 15 in fall or spring.
  - Participate in the class requirements of the internship

Learning Outcomes — INFO 294

After successfully applying to an internship site, the student must create a set of Learning Outcomes, which are statements that describe what the students will have learned and are able to **do** by the end of the semester as a result of engaging in the internship. These statements should focus on the acquisition of observable and measurable knowledge, skills and abilities.

IMPORTANT: Learning outcomes should **not** be broad and overarching but address the **specific day-to-day job duties.**

The learning outcomes and internship responsibilities should be agreed on **in consultation with the internship site supervisor,** and a statement of those outcomes submitted to the appropriate internship faculty supervisor (via the Professional Experience: Internship - Student Application form) for approval before the internship begins.

For more information and how to write your INFO 294 learning outcomes, see:

- Bloom's Taxonomy of Learning
- Bloom's Taxonomy Revised
- Writing Learning Outcomes
- Learning Outcomes as Learning Expectations

Bloom's Taxonomy of Learning — INFO 294

Learning Outcomes are based on a revision of Bloom's Taxonomy of Learning, which explain why we learn: to remember, to understand, to apply, to analyze, to evaluate, and to create.

These six levels build upon each other, creating a hierarchy of learning:

- *Remember* = recall and recognize facts
- *Understand* = interpret, translate or paraphrase information remembered (you must remember before you understand)
- *Apply* = use information in a situation different from the original learning context (you must understand before you apply)
- *Analyze* = separate information into its essential elements to make things clear (you must be able to apply in order to analyze)
- *Evaluate* = make judgments or decisions based on information from your analysis and form new information (you must analyze in order to evaluate)
- *Create* = generate new ideas or ways to look at a current issue or idea (you must evaluate before your create)

Writing Learning Outcomes — INFO 294

To write Learning Outcomes, focus on the desired “end state” of a process and how achievement can be measured. Educational theorists have developed lists of action verbs that reinforce each of the six levels of learning. Here are some examples:

1. Remember — define, recall, list, recognize, memorize
2. Understand — classify, discuss, explain, identify, describe
3. Apply — interpret, choose, employ, illustrate
4. Analyze — contrast, compare, distinguish, differentiate
5. Evaluate — appraise, judge, select, support
6. Create — assemble, construct, design, develop, formulate

Certain verbs are unclear and subject to different interpretations in terms of what actions they specify. Such verbs call for covert behavior, which cannot be observed or measured, and as such **these types of verbs should be avoided**: appreciate; become aware of; become familiar with; learn; know.

Remember: Learning outcomes should **not** be broad and overarching but address the **specific** day-to-day job duties.

Sample Learning Outcomes

- "Develop arrangement schema and formulate processing timelines for archival collections while considering institutional resources and priorities."
- "Apply archival survey and arrangement methods to unprocessed manuscript collections."
- "Compare, select and employ appropriate preservation methods and materials for archival objects."
- "Appraise collection materials for retention and disposition based on institutional policies, research needs and archival standards/guidelines."
- "Facilitate information management and retrieval by designing and constructing descriptive finding aids and accurate electronic records using archival standards."

More Sample Learning Outcomes

- "Discover university level Open Access ebooks, dissertations and journals from various OA providers."

- "Create collections in OCLC's knowledge base"
- "Populate those collections with university level, Open Access content from provider websites;."
- "Troubleshoot discoverability and access problems for those collections within an OCLC WorldShare environment."

Learning Expectations — INFO 294

In order to effectively shape your Learning Outcomes, you need to determine what level of learning should result from your internship. Learning at the "remembering" level is basic—essentially memorizing information. Most internship sites desire a more substantial contribution beyond this. A single outcome at the “remembering level” may be acceptable when combined with higher levels, but we will be very skeptical if all your outcomes remain this basic.

At the very least we expect outcomes at the "understanding" level or above. To really contribute at your internship site, you'll probably need to know something well enough to apply it, so gearing your outcomes to the "application" level is a good focus for preparing your outcome statements. If you can reasonably get your Learning Outcomes to the three highest levels, then so much the better for you and your internship site. However, your Learning Outcomes do not all have to be at the same level. You might have two major high-level outcomes paired with one or two at a lower level.

Finally, please be aware that learning outcomes are NOT the same as E-portfolio competencies (INFO 289). While your internship experience may help you meet one or more competencies, using one of the competency statements (in whole or in part) for a learning outcome will not be accepted.

Applying for INFO 294

All students must submit a Professional Experience: Internship - Student Application form after successfully receiving notification of acceptance from an internship site.

Students must provide information on the internship, the site, and the site supervisor and also submit their statement of Learning Outcomes (we recommend that you keep a copy of them for yourself). Please remember to include your e-mail address.

The faculty supervisor can then approve the internship site and the student's Learning Outcomes. Your faculty supervisor may ask for revised Learning Outcomes at his or her discretion.

The faculty supervisor will include with the approval the section of INFO 294 that the student should register for -and a permission number that will enable them to register.

The faculty supervisor is:

For MLIS, MARA, Post Masters Certificate: Dr. Mary Ann Harlan

Read about the responsibilities of faculty supervisors.

Negotiating with INFO 294 Site Supervisor

Once a student has acquired an internship and cleared Learning Outcomes with faculty, he or she will work with a professional at the site who will act as the site supervisor. The student and the site supervisor will develop various projects/activities that the student will pursue to accomplish the defined Learning Outcomes. The student and site supervisor will negotiate the work schedule to be followed, as well as handle any additional paperwork that may be required by the site.

Registering for INFO 294

- Find and confirm the internship placement.
- Submit the Professional Experience: Internship - Student Application form.
- The faculty supervisor will send approval to register. As part of the approval, you will be told which section of INFO 294 to register for on one.sjsu.edu–and will be given a permission number.
- If your Professional Experience: Internship - Student Application form has been submitted and your internship approved by the appropriate faculty supervisor, you will be added to the appropriate Canvas course site for your internship class by the first day of the semester.

Be mindful of registration and enrollment dates available here.

Fulfilling Course Requirements — INFO 294

In addition to meeting the requirements of the internship position and completing all the onsite or virtual internship hours (180 hours for a 4 unit internship; 135 hours for a 3 unit internship; 90 hours for a 2 unit internship,) students must submit all of the following during the semester -**on time-** as determined by the faculty supervisor:

- Status Reports
- Final Report: At the conclusion of the internship, the student will be required to submit a final report indicating how the Learning Outcomes established for the internship were met. If for some reason the Learning Outcomes were only partially met, or not met at all, some discussion of what happened will be necessary. The deadline for the final report will be set by the faculty supervisor.
- Site Evaluation: The Student Evaluation of Site form allows the student to provide feedback on the internship site's effectiveness in hosting an iSchool intern and to recommend the site's continuance or discontinuance as an internship site. This must be completed at the end of the semester.

Previous Students' Internship Experiences — INFO 294

Many students have successfully completed internships in a variety of organizations, both on-site and virtually.

Read about the work of former student interns by browsing our school's Community Profiles.

Complimentary Student Memberships In Professional Associations

We believe membership in professional associations will enhance your understanding of the profession and the issues it faces, which is part of the content of INFO 200, MARA 200 IDT 201 and INFM 200. It also encourages connections between the associations and our students.

During the add/drop period, students will be given the option to select **one** of the associations for their one year free membership. **Watch your MySJSU account for**

messaging with instructions on how and when to complete your request. You will be joined at your address on file in MySJSU. If no selection is made, you will NOT be joined to any association.

Students enrolled in a 200 course during the summer will be included with those enrolled for fall semester.

You will be joined at your address on file in one.sjsu.edu*. If you do not make a selection, you will not receive a complimentary membership.*

MLIS

All MLIS students in INFO 200 are given a complimentary (**free!**) one-year membership in one of the following professional associations:

- American Library Association (ALA)
    - iSchool ALA Student Chapter
- Association for Information Science and Technology (ASIS&T)
    - iSchool ASIS&T Student Chapter
- Society of American Archivists (SAA)
    - iSchool SAA Student Chapter
- National Association of Government Archivists & Records Administrators (NAGARA)
- ARMA International (ARMA)

You will be joined at your address on file in my.sjsu.edu. *If you do not make a selection, you will not receive a complimentary membership.*

Notes regarding ALA:

- Once your information has been sent to ALA, there is an extensive processing period. There is a possibility that students may not receive their memberships in time to complete ALA conference advance registration with member status.
- Check with ALA Membership for help with membership status questions once your membership request has been sent from iSchool.
- Students enrolled in INFO 200 in summer will be included with those enrolled for fall semester. Lists of names are sent twice a year to ALA: fall and spring.

- If you select ALA and are already a member of ALA or one of the ALA-affiliated state library associations we have been told that your membership will be extended for a year; please deal directly with the association.
- If you select ALA and live in a state other than California, you will receive the ALA membership and, if your state has a state association with an arrangement with ALA [there are eighteen at present, see joint membership program list], you will be joined with that state association as well; in other words a student in Washington will be joined with the Washington Library Association, not the California Library Association; if there is no affiliated program the student will join ALA only.

MARA

All MARA students in MARA 200 are given a complimentary (**free!**) one-year membership in one of the following professional associations:

- Association for Information Science and Technology (ASIS&T)
- National Association of Government Archivists & Records Administrators (NAGARA)
- Society of American Archivists (SAA)
- ARMA International (ARMA)

You will be joined at your address on file in my.sjsu.edu. *If you do not make a selection, you will not receive a complimentary membership.*

Informatics

Informatics students enrolled in INFM 200 get a complimentary (**free!**) one-year student membership in one of the following professional associations:

- Association for Information Science and Technology (ASIS&T)
- HIMSS
- American Nursing Informatics Association

MSIDT

All students in IDT 201 are given a complimentary (free!) one-year membership in ***one*** of the following professional associations:

- Association for Educational Communications and Technology (AECT)
- International Society for Technology in Education (ISTE)
- Learning Guild
- Association for Talent Development (ATD)

Complimentary Professional Membership Sign-up Form

All students in INFO 200 are given a complimentary (free!) one-year membership in ***one*** of the following professional associations:

- American Library Association (ALA)
- Association for Information Science and Technology (ASIS&T)
- Society of American Archivists (SAA)
- National Association of Government Archivists & Records Administrators (NAGARA)
- ARMA International (ARMA)

All students in MARA 200 are given a complimentary (free!) one-year membership in ***one*** of the following professional associations:

- Association for Information Science and Technology (ASIS&T)
- Society of American Archivists (SAA)
- National Association of Government Archivists & Records Administrators (NAGARA)
- ARMA International (ARMA)

All students in INFM 200 are given a complimentary (free!) one-year membership in ***one*** of the following professional associations:

- Association for Information Science and Technology (ASIS&T)
- HIMSS
- American Nursing Informatics Association

All students in IDT 201 are given a complimentary (free!) one-year membership in ***one*** of the following professional associations:

- Association for Educational Communications and Technology (AECT)
- International Society for Technology in Education (ISTE)
- Learning Guild
- Association for Talent Development (ATD)

Please use this form to select which association you wish to join. **This form will open on January 22, 2026 for submissions. The deadline for making a selection is February 17, 2026.** *This is a hard deadline and cannot be extended. If you miss the deadline, you will not be able to partake in the complimentary membership.*

If you do not make a selection, you will not receive the complimentary membership.

You will be joined at your address on file in MySJSU.

We cannot change a selection once it is made.

Once you successfully make your selection, you will be taken to a page that confirms your selection has been made.
